

MEDITECH: IPlan Change Adjustment Journal

Introduction

This job aid provides instructions on how to use the IPlan Change Adjustment Journal to reverse the previous PCON adjustment and any other manual adjustments posted under an incorrect IPlan.

Note: *Adjustments posted in the IPlan change adjustment journal do not require leadership approval.*

Create and Post Adjustment

1. In MEDITECH **BAR**, click **Desktops>Process Batches**.
2. Click **New/Process**.
3. Click **OK**.

The screenshot shows a dialog box for creating and posting an adjustment. The dialog has a light green background with a darker green border. On the right side, there is a 'Selection' button with a red border, which is currently selected. Below it, there is a 'New/Process' button. At the bottom of the dialog, there are 'Cancel' and 'OK' buttons, with the 'OK' button highlighted by a red border. The main area of the dialog contains several input fields and dropdown menus for specifying the adjustment details:

- *From Date: A date picker with a green highlight.
- Thru Date: A date input field.
- From Number: A number input field.
- Thru Number: A number input field.
- Restrict to Journal: A dropdown menu.
- Restrict to Status: A dropdown menu.
- Restrict to Batch Type: A dropdown menu.

4. Complete the following information.

MEDITECH: IPlan Change Adjustment Journal

Field	Action
Date	Type T and press Tab.
Journal	Type ADJ PIPC .

Verify Adjustment(s) Posted Appropriately

1. Click **Inquiry>Other Inquiry>Select Txns.**
2. Click **Adjustment.**
3. Click **OK.**

4. Verify reversals posted appropriately.

Summary: After you have reversed all adjustments under the incorrect IPlan, you will need to add the correct IPlan. See [MEDITECH: IPlan Change](#) for more information.
